

Missing Person Report**Case File No.:** 2001-458D-MEAD**Date Filed:** March 14, 2001**Filed By:** Massachusetts State Police – Department of Missing Persons**Status:** Unresolved / Under Ongoing Review

Subject Information:

- **Name:** Dr. Daniel Mead
 - **Date of Birth:** November 3, 1939
 - **Age at Time of Disappearance:** 68
 - **Nationality:** Germany
 - **Sex:** Male
 - **Height:** 6'0" (183 cm)
 - **Weight:** 175 lbs (79 kg)
 - **Eye Color:** Hazel
 - **Hair Color:** Brown
 - **Last Known Residence:** Cambridge, Massachusetts
 - **Occupation:** Theoretical Physicist and Acoustic Researcher
 - **Affiliation:** Harvard-MIT Center for Acoustic Dynamics, HFTI Foundation
-

Summary of Disappearance:

Dr. Daniel Mead, a noted physicist specializing in the intersection of sound resonance and neurological patterns, was last seen on **March 10, 2001**, departing from his private research office located within the Cambridge Acoustic Annex, a satellite lab connected to his work under a classified research contract. Dr. Mead's work involved the theoretical reconstruction of

frequencies derived from ancient artifacts and anomalous resonance patterns that he believed could affect human perception and consciousness.

According to colleagues, Dr. Mead had become increasingly reclusive in the months prior to his disappearance, reportedly working on a “harmonic convergence model” which he claimed could “reveal previously undetected layers of reality through directed resonance.” Unverified notes recovered from his lab mentioned exposure to “patterned interference fields” and included irregular EEG charts with unexplained spikes.

He failed to attend a scheduled symposium at MIT on March 11 and was reported missing by his assistant on March 12. His personal belongings, including keys and wallet, were found in his locked office. Surveillance footage showed him entering the building but no evidence exists of his departure.

Investigative Notes:

- No signs of forced entry or foul play were found at the research site.
- His notes reference “The Hidden Frequency” and an unnamed “threshold signal” reached in early March.
- Federal agencies briefly classified the investigation citing possible national security interests but released the case back to local authorities in 2002.
- Multiple tips regarding his possible sightings remain unconfirmed. No evidence of financial or digital activity has been recorded since the date of disappearance.

Current Status:

As of this date, Dr. Daniel Mead remains missing. His disappearance is considered suspicious and potentially linked to his experimental research. Anyone with information is urged to contact the Massachusetts State Police Missing Persons Unit.
